Abstract

Cyber banking is internet banking system. Online banking, also known as internet banking, e-banking or virtual banking, is an electronic payment system that enables customers of a bank or other financial institution to conduct a range of financial transactions through the financial institution's website. The online banking system will typically connect to or be part of the core banking system operated by a bank and is in contrast to branch banking which was the traditional way customers accessed banking services. Fundamentally and in mechanism, online banking, internet banking and e-banking are the same thing.

Internet banking is available to all individuals, including both resident and non-resident Indians as well as to Partnership firms and Corporates. You can perform all your routine banking activities online conveniently and comfortably from wherever you are.
