DATA WAREHOUSING MANAGEMENT

Abstract

For optimal sales and inventory management processes, you need robust functionality for managing your logistics facilities. Support for inventory management helps you record and track materials on the basis of both quantity and value.

Warehouse inventory management functions cover internal warehouse movements and storage.

Using this software we can reduce costs for warehousing, transportation, order fulfillment, and material handling – while improving customer service.

You can significantly improve inventory turns, optimize the flow of goods, and shorten routes within your warehouse or distribution center. Additional benefits of inventory management include improved cash flow, visibility, and decision making.

This software is user friendly and hence easy to use. Employees can plan, enter, and document warehouse and internal stock movements by managing goods receipts, goods issues, storage, picking and packing, physical stock transfers, and transfer postings.
