E-COMPLIMENT CARDS

ABSTRACT

This Project is aimed to help people & organizations to show that there caring & loving for others around them. This in turn will help organizations build good relationship among the employees and to retain them. The solution/system has been built keeping in mind that this will be implemented as part of an organization intranet solution. Every organization has to maintain good relationship with all the employees to retain them, so the people and organization have to show there caring and loving for others around them.

The project has been planned to be having the view of distributed architecture, with centralized storage of the database. The application for the storage of the data has been planned. Using the constructs of MS-SQL Server and all the user interfaces have been designed using the ASP.Net technologies. The database connectivity is planned using the “SQL Connection” methodology. The standards of security and data protective mechanism have been given a big choice for proper usage. The application takes care of different modules and their associated reports, which are produced as per the applicable strategies and standards that are put forwarded by the administrative staff.
