Abstract:

This project is mainly developed for the Account Division of a Banking sector to provide better interface of the entire banking transactions. This system is aimed to give a better outlook to the user interfaces and to implement all the banking transactions like: Supply of Account Information, New Account Creations, Deposits, Withdraws, Check book issues, Stop payments, Transfer of accounts, Report Generations.

This service is open only to savings bank customers and not for current account holders. The customer is privileged to use most of the system only as a viewing phase, the only online transactions the customer can do are Check book requisition and fund transfer among his personal accounts. The project has been planned to be having the view of distributed architecture, with centralized storage of the database.
