Abstract

Jewellery management system is developed in ASP.NET, which can keep track of all your business activity in a jewellery shop from small segments to large and very large segments. To obtain the optimum quality, jewellers have to upgrade those ingredients by which the quality is affected. To upgrade those ingredients the jewellers have to depend on some types of data. So, if the decision making person of the business wants to have a grip on the total business, he/she will have to have a knowledge of the entire flow of data and information within the organisation. It cannot be done without the help of a Business Related Software. Jewellery management system is developed in Asp.Net, which can keep track of all your business activity in a jewellery shop from small segments to large and very large segments. As we all know the jewellery trade can be divided into three major categories i.e. 1) Retail, 2) Wholesale, 3) Export.
