Abstract

**OCRS** is online course registration System; it is a web-based registration, course scheduler and payment making & tracking application. It manages the registration process for classes, workshops, seminars, on-line courses, conferences, and other enrolment-based events. It is used by clienteles/students to register courses anytime anywhere; it is used by administrators to schedule courses, organize groups, track payments anytime anywhere; it is also used by instructors to track student attendance, to make grades.

It allows past registrants know through in-account announcement, broadcast emails about new courses and services according to their attendance history and interest areas. All course/schedule information is always available, always accurate.
